SPECIALIZED DISCLOSURE REPORT

DYNAMIC MATERIALS CORPORATION

(Exact name of Registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or
organization)

0-8328

(Commission
File Number)

84-0608431

(IRS Employer Identification No.)

**5405 Spine Road
Boulder, Colorado**

(Address of principal executive offices)

80301

(Zip Code)

Michael Kuta

(303) 665-5700

(Name and telephone number, including area code, of the
person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

As required by Rule 13p-1 under the Securities Exchange Act of 1934, as amended, and the requirements of Form SD (collectively, the “Conflict Minerals Rule”), a Conflict Minerals Report is provided as Exhibit 1.01 to this Form SD and is available on our corporate website at <http://www.dmcglobal.com/investors/governance#governance>. The information contained on our website is not incorporated by reference into this Form SD or the Conflict Minerals Report and should not be considered

to be part of this Form SD or the Conflict Minerals Report.

Certain of the products manufactured by Dynamic Materials Corporation (together with its consolidated subsidiaries, “DMC” or the “Company”) contain metals extracted from cassiterite, columbite-tantalite, wolframite and/or their derivatives. These minerals and gold constitute “Conflict Minerals” under the Conflict Minerals Rule. Specifically, some of the clad plates manufactured by the DMC’s NobelClad division included tantalum plates. Those are the only DMC products where a significant amount of any Conflict Mineral is used. Other DMC products may have trace amounts of Conflict Minerals, such as in a metal alloy or in weld wire residual which remains in the product in the NobelClad division or in liners, explosive powders, and pastes in products sold by DMC’s DynaEnergetics division.

In accordance with the Conflict Minerals Rule, the Company undertook to perform a reasonable country of origin inquiry (“RCOI”) of its raw materials suppliers because Conflict Minerals are or may be necessary to the functionality or production of certain products manufactured by DMC.

For this RCOI, the Company identified suppliers from which it purchased raw materials during 2015, contacted each, and requested that each provide DMC information about the extent to which their products purchased by DMC did or did not include any Conflict Minerals. The preferred response format was a completed Conflict Minerals Reporting Template (the “Template”), which was developed by the Electronic Industry Citizenship Coalition and Global e-Sustainability Initiative (“EICC/GeSI”). The EICC/GeSI, also known as the Conflict-Free Sourcing Initiative, is a joint venture by these two organizations to help companies source conflict-free minerals. The Template was developed “to help companies gather due diligence in a common format.”

DMC reviewed the completed Templates or other information provided by the suppliers with respect to the inclusion of Conflict Minerals in their products which DMC had purchased, and requested further information or clarification from the suppliers where it was deemed necessary or appropriate.

Item 1.02 Exhibit

In accordance with the Conflict Minerals Rule, a Conflict Minerals Report for the year ended December 31, 2015 is filed as Exhibit 1.01 to this Form SD.

Section 2 – Exhibits

Item 2.01 Exhibits

Exhibit 1.01 – Conflict Minerals Report

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

DYNAMIC MATERIALS CORPORATION

Dated: May 31, 2016

By: /s/ Michael Kuta

Michael Kuta

Chief Financial Officer

Dynamic Materials Corporation
Conflict Minerals Report
For The Year Ended December 31, 2015

Introduction

This is the Conflict Minerals Report of Dynamic Materials Corporation (“DMC”) for calendar year 2015 in accordance with Rule 13p-1 (“Rule 13p-1”) under the Securities Exchange Act of 1934 (the “1934 Act”). Unless the context indicates otherwise, the terms “DMC,” “we” and “our” refer to Dynamic Materials Corporation and its consolidated subsidiaries. Please refer to Rule 13p-1, DMC’s Form SD and the 1934 Act Release No. 34-67716 for definitions to the terms used in this Report, unless otherwise defined herein.

Where the reasonable country of origin inquiry (“RCOI”) indicated that raw materials which we purchased and were incorporated in our Products may have contained Conflict Minerals from the Conflict Areas, we expanded the RCOI into due diligence, as required under paragraph (c)(1) of Rule 13p-1.

Due Diligence Framework

DMC’s due diligence framework was designed in accordance with OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (Second Edition, 2013) (the “OECD Framework”), an internationally recognized due diligence framework.

Due Diligence Measures Undertaken

DMC’s due diligence included the following processes:

- Communicated DMC’s Conflicts Mineral Compliance Policy, which was established in 2013, to our employees and vendors.
 - Created an internal Conflict Minerals Compliance Team to design and lead DMC’s due diligence and risk mitigation efforts.
 - Identified all vendors from which DMC purchased raw materials during 2015.
 - Requested that each such vendor provide DMC information about the extent to which its products purchased by DMC did or did not include any Conflict Minerals.
 - Obtained from each applicable vendor a completed Conflict Minerals Reporting Template, which was developed by the Electronic Industry Citizenship Coalition and Global e-Sustainability Initiative (“EICC/GeSI”).
 - Identified any vendor who indicated that its product(s) may have contained Conflict Minerals from the Conflict Areas.
 - Verified that all smelters used by our vendors were listed as compliant with the Conflict-Free Smelter Program assessment protocols of the Conflict Free Sourcing Initiative and thus met the requirements for classification as a Conflict-Free Smelter.
-

Product Description: Smelter and Refiner and Country of Origin Information

Consistent with the Securities and Exchange Commission's Order Issuing Stay (File No. S7-40-10) dated May 2, 2014, and related Statement dated April 29, 2014, DMC is providing information regarding its efforts to determine which, if any, of DMC's products contain any Conflicts Minerals from the Covered Countries.

- Products: certain liners and related materials containing tungsten used in the DynaEnergetics division.
- Smelters and Refiners Used to Produce the Conflict Minerals/Efforts to Determine Mine or Location of Origin: The five tungsten Smelters that our vendors identified as being the source of these materials are listed on the Conflict-Free Tungsten Smelter list published by the Conflict Free Sourcing Initiative, and are as follows:

Smelter Name

Xiamen Tungsten (H.C.) Co., Ltd.

Xiamen Tungsten Co., Ltd.

Guangdong Xianglu Tungsten Co., Ltd.

Jiangxi Gan Bei Tungsten Co., Ltd.

Hunan Chenzhou Mining Group Co., Ltd.

We endeavored to determine the mine or location of origin of the Conflict Minerals contained in our products by requesting that our vendors provide us with a completed Template concerning the source of the Conflict Minerals in the products sourced from them. We also reviewed publicly available information to try and determine the mine or location of origin of Conflict Minerals used by the Smelters identified to us.

- Country of Origin: The tungsten identified as originating from Covered Counties was determined to have come from Rwanda and Burundi. Smelter intake was also reported as having originated from Australia, Bolivia, Brazil, Canada, China, Columbia, USA, Mexico, Nigeria, Russia, Spain, Thailand, Vietnam, and Malaysia.

Risk Mitigation/Future Due Diligence Measures

For reporting for the year ending December 31, 2016, DMC plans to continue its efforts to improve information gathered from its RCOI and due diligence processes to mitigate the risk further that its necessary conflict minerals do not benefit armed groups. The steps include:

- Continuing efforts to increase the response rate from vendors;
- Continuing the use of conflict minerals assessment in the vendor approval process;
- and
- Reviewing and enhancing, where we deem appropriate, the composition and training of the internal group leading DMC's conflict minerals compliance efforts.
